To clear the cache in Chrome, do the following:
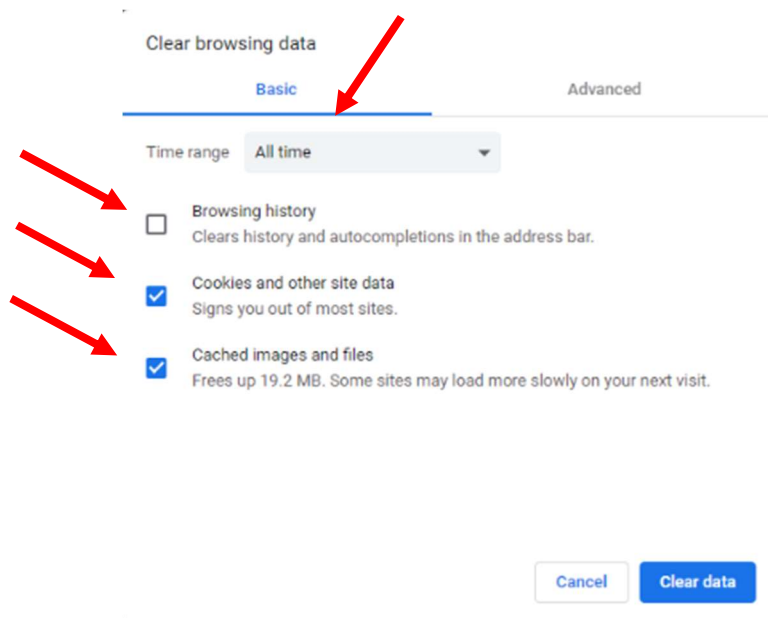

1. Select the 3 dots in the top right to display a menu.

2. Scroll down to "More tools" and then select "Clear browsing data"

3. This will open a new tab with the following default options. Please uncheck the browsing history.

4. Leave the time range for "All time" and the 2 other checkboxes checked and select clear data.
5. Once it has completed, close all instances of Chrome and open a brand new session.
