

Illinois Department of Innovation & Technology

Agency Technology Service Requester (ATSR)

User Guide

DoIT provides technology (Information Technology (IT) & Telecom) products and services to designated State of Illinois agencies, boards, commissions, educational institutions, and municipalities (collectively known as “agencies”). Each agency is required to have an individual(s) who is responsible for the ordering of technology products and services and keeping track of developments and other ancillary services.

Requester Roles

A user can be designated as one of the following roles:

- **Agency Technology Service Requester (ATSR)** – serve as an authorized order approval/spending authority for DoIT technology (IT and Telecom) products and services on behalf of the Agency.
- **Submitter** – does not have approval authority or spending authority on behalf of the Agency. All requests submitted by a user in the Submitter role will require ATSR approval.

Agency Technology Service Requester (ATSR)/Submitter Designation

Each agency has unique needs that must be considered when recommending and providing service. DoIT requires that each agency designate an Agency Technology Service Requester. Based on agency business operations and volume of activity, multiple requesters may be designated.

DoIT considers an Agency Technology Service Requester (ATSR) to be the agency's authorized submitter for all requests for information Technology/Telecommunication products and services. This individual must have sufficient agency knowledge and spending authority to fulfill the responsibilities defined under "Agency Technology Service Requester Roles and Responsibilities".

An agency head (Agency Director, Agency Chief Fiscal Office (CFO), Chairman of a Commission, Chancellor of a University, etc.) must designate Agency Technology Service Requesters (ATSR) or change the authority of an existing requester.

An Agency Chief Information Officer (CIO) may designate a Submitter or change the authority of an existing Submitter.

ATSR/Submitter designations require an [ATSR/Submitter Role Access](#) request found in ServiceNow. The designation form is available for download on the ATSR/Submitter Role Access request. Once designation form is completed, it will then need to be attached to the ATSR/Submitter Role Access request. Once the request is received, the user will be sent an invitation for New ATSR/Submitter training. Once training has been completed by the user, access rights will be granted.

Agency Technology Service Requester (ATSR) Responsibilities

As a user in the ATSR role, your Agency has designated you with certain responsibilities. The responsibilities include the following:

- Determine Agency end user service and equipment needs.
- Submit service requests in accordance with published fulfillment lead time.
- Review and approve IT service requests within the Agency to ensure compliance with DoIT and agency guidelines.
- Work with the DoIT@Agency Chief Information Officer (CIO), Agency Fiscal Officer, and agency-appointed GOMB Analyst to budget for **IT** expenditures and ensure that adequate funds are available.
Note: All requests for laptops, desktops and monitors require GOMB approval be attached.
- Track and provide status to Agency stakeholders on open service requests.
- Assist DoIT in maintaining up-to-date inventory records of Agency **IT** equipment (via submittal of service requests for adds, moves, and changes).

Obtaining DoIT Assistance

There are three means to obtain DoIT assistance as described below. ***This document concentrates on the Service Request Process.***

Service Request – obtain new service, modify an existing service, or discontinue a service (i.e. receive a new component or function, change an existing component or function, or disable/delete an existing component or function). Service requests are submitted via the Agency Technology Service Requester.

Incident – an existing component or functions is no longer working or is degraded in quality (i.e. something is broken and in need of repair). Incident records may be submitted by the end user via [Report a Problem](#) or calling the IT Service Desk (217.524.3648 or 312.814.3648); or submitted by the Agency Technology Service Requester if deemed appropriate by your agency.

Governance – a significant service effort based on a number of affected users, time to execute, and/or cost. Qualifying guidelines are listed below. Governance requests are submitted via the [EPM Portal](#).

- Add or modify business functionality
- Move to new or updated technology platform
- Replace an existing system
- System in/out-sources
- Enterprise (multi-agency) implications

Service Request Process

Agencies obtain services (e-mail, security, software, personal computing, cellular devices, data, Voice, VoIP, Video, etc.) by submitting requests through [ServiceNow](#). The request fulfillment process is comprised of the following activities.

1. The end user (or supervisor) notifies the ATSR/Submitter of a service need.
2. The ATSR/Submitter creates a service request through ServiceNow. If an ATSR opens the request, the request will automatically be approved.
3. If a request is opened by a Submitter, an ATSR will approve the service request through ServiceNow. By approving the request, the ATSR gives authorization for these services to be rendered and billed to the agency.
4. The Opened by, Requested for user and the Task/Site Coordinator will receive email notification that a request has been opened.
5. Once request is approved, tasks are assigned to DOIT Services team(s) using built-in workflow, designed for each catalog item.
6. Once all tasks are completed by DoIT service team(s), ServiceNow notifies the Opened by, Task/ Site Coordinator, and Requested for user identified in the request.

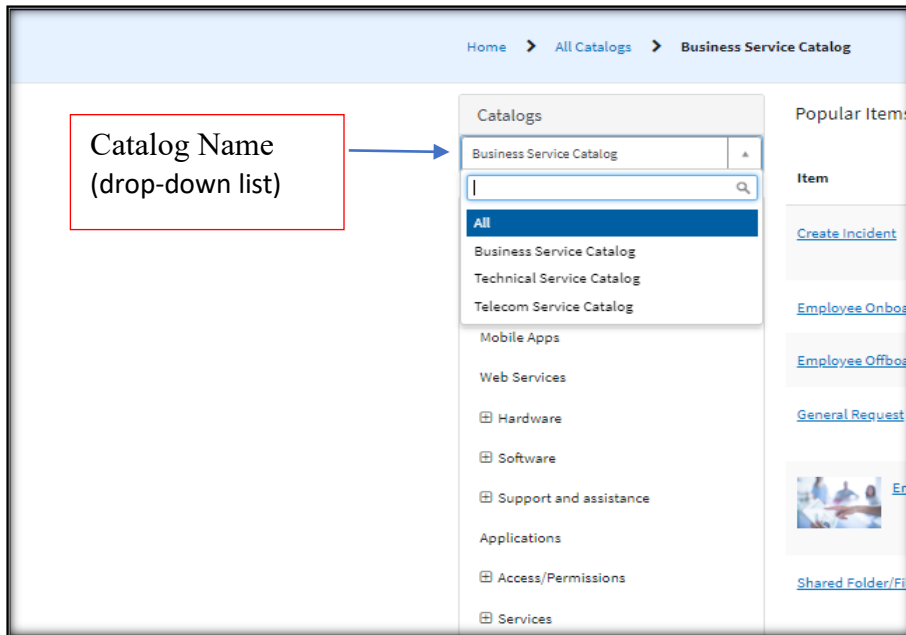

ServiceNow Catalog

Requests for products and services are submitted using ServiceNow via the following service portal link:

- <https://illinoisgov.service-now.com/sp>

There are 3 catalogs available in ServiceNow. As a user in the ATSR/Submitter role, you will see the following catalogs:

- **Business Service Catalog** – IT products and services
- **Technical Service Catalog** – For DoIT Technicians only (*NOTE: ATSR/Submitter role will not see this catalog*)
- **Telecom Service Catalog** - Telecom products and services

Basic Information for Business Service Catalog

The following standard questions are asked in all Business Service Catalog items:

Request Information

Opened by * Requested For Agency

Requested for Email address

Location Business phone

Mobile phone

Request Information:

- The *Opened by* field is pre-populated with the Agency Technology Service Requester's (ATSR) information or Submitter information.
- The *Requested For Agency* is the Agency requesting the service.
- *Requested for* field is the name of the service recipient. The Email address, Location, Business phone and Mobile phone will be populated once Requested for is selected.

NOTE: If service recipient is not found in the drop-down list, then choose the generic Agency User (i.e. DOIT User). This will prompt for Guest User Details to be completed with service recipient information.

Guest User Information – If using generic Agency User, completing the Guest User Information is REQUIRED to ensure consistent identification of and reference to the service recipient going forward. If a Middle Initial is available, it is required. Street Address should be the address associated to “911” (P.O. Box numbers and building name are not permissible).

Important Reminder: All Employee Onboarding requests should use the generic Agency User in the Requested for field (except intra-agency transfers)

Agency info

Requested by Agency Debit Code

* Select a Billing Code Agency Tracking Number

Billing code

Agency info: *Requested by Agency* will be populated with the Agency name associated with the ATSR/Submitter requesting services.

Select a Billing Code- Select Agency specific cost center (Required)

Debit Code – Agency billing/budget code. (Optional)

Billing Code – Billing code will be populated once you Select a Billing Code

Agency Tracking Number – If the approval for this request results from an existing internal Agency tracking system, enter the applicable system’s assigned reference number. (Optional)

Task Coordinator	
Task Coordinator Name	Task Coordinator Telephone
<input type="text"/>	<input type="text"/>
Task Coordinator Email	Task Coordinator Agency
<input type="text"/>	<input type="text"/>

Task Coordinator:

Task Coordinator Name - Name of the person to be contacted by the DoIT Services Teams if additional details are needed. Typically, this would be the supervisor of the individual receiving the service or the individual knowledgeable about the service request.

(If left blank, support staff will assume the Agency Technology Service Requester as the contact person).

Once a *Task Coordinator Name* is chosen from drop-down list, *Task Coordinator Telephone*, *Task Coordinator Email* and *Task Coordinator Agency* will be populated.

Catalog Item Specific Questions – Each catalog service asks unique questions related to the service. Answer all questions as completely as possible to ensure timely response and minimize follow-up questions.

When all questions have been answered, submit the request. Once the request is submitted, a summary of the request with REQ number will be provided.

ServiceNow Business Service Catalog Items

Catalog items are presented in the Business Service Catalog under the following Categories/Subcategories:

Category: Audit Request

Catalog Item Name		Lead Time:
Audit Request		
Short Desc	Use this catalog item to request evidence necessary for your agencies external audit requests.	
Description	Use this catalog item to request evidence necessary for your agencies external audit requests. (Please note – minimum of 3 days is required to process your request)	

Catalog Item Name		Lead Time:
Catalog Access to Audit Artifact Requests		
Short Desc	Request access to Audit Artifact Request catalog item	
Description	Use this catalog item if you need access to Audit Artifact Requests. An attached document showing your justification for access is required. You can only request access for yourself. Once approved, you will be able to access the catalog item “Audit Artifact Request.”	

Category: Hosting Services

Catalog Item Name		Lead Time:
Citrix Virtual Desktop Workspace		15 days
Short Desc	This request is used to provide a user with a Citrix virtual workspace and software.	
Description	<p>This request item is used to select Citrix VDI with additional software not already provided.</p> <p>Types of VDI Requests:</p> <p>Standard VDI - provides a desktop experience on the standard agency VDI with applications utilized by the workers.</p> <p>Developer VDI - provides a Windows Desktop VDI that can be used for software development with developer tools.</p> <p>Persistent Developer VDI - provides a Windows Desktop VDI that can be used for software development with developer tools and includes a limited size persistent layer.</p> <p>Extra Compute VDI - provides a Windows Desktop VDI that can be used for software development with developer tools and includes additional resources. (Note: The Extra Compute VDI requires justification).</p> <p>Software included with Standard VDI:</p> <ul style="list-style-type: none"> 7-Zip BlueZone (Rocket TE) Entrust MS Access MS Excel MS Outlook MS PowerPoint MS Project MS Publisher MS Office 365 MS One Drive MS Teams MS Visio MS Visual Studio MS Word PuTTY Tableau Desktop WinSCP <p>Software included with Developer VDI, Persistent Developer VDI, & Extra Compute VDI:</p> <ul style="list-style-type: none"> 7-Zip BlueZone (Rocket TE) Entrust MS Access MS Excel MS Outlook MS PowerPoint MS Project MS Publisher MS Office 365 MS One Drive MS Teams MS Visio\ MS Visual Studio 	

Category: Infrastructure

Catalog Item Name		Lead Time:
SQL Database Services		15 days
Short Desc	Perform database services (Create, Delete, Change, Backup, Restore)	
Description	Perform database services (Create, Delete, Change, Backup, Restore)	

SubCategory: Network

Catalog Item Name		Lead Time:
Network LAN Wireless (WiFi)		5 days
Short Desc	Network LAN Wireless (WiFi)	
Description	Wireless Services will centrally manage the acquisition, installation, operation and maintenance of wireless access points for DoIT managed agencies. DoIT has standardized on Cisco for wireless LAN offering. Wireless Local Area Network (WLAN) services provide WiFi access for internal networks as well as guest internet for DoIT managed mobile devices as well as personal and public devices.	
Network LAN Connectivity Wired		10 days
Short Desc	Network LAN Connectivity Wired	
Description	Local Area Network (LAN) infrastructure within a building or agency environment enabling data communication among local IT resources within an organization. These services support the infrastructure components and resources beginning where the end device connects into a wall plate. Wired Services are available to State of Illinois agencies, boards and commissions that DoIT presently supports.	

SubCategory: Storage

Catalog Item Name		Lead Time:
Storage Hardware request		5 days
Short Desc	Server storage space	
Description	Storage space assigned to a file server. Can be block or file storage depending on the application	

Category: Mobile Apps

Catalog Item Name		Lead Time:
Mobil App Request		5 days
Short Desc	Request for mobile app to be available for download to Mobile Devices.	
Description	<p>Request for mobile app to be available for download to Mobile Devices. (SOI mobile phones and iPads only)</p> <p>Note: Free apps will be delivered and available to all mobile users at the agency. If there's a cost associated, the delivery of the app will have to be configured and limited to specific users.</p>	

Category: Web Services

Catalog Item Name		Lead Time:
Adobe Experience Manager (AEM) Websites		90 days
Short Desc	Create, Modify, Migrate or Decommission a website	
Description	<ul style="list-style-type: none"> <u>Create</u> DoIT provides "Public" website creation and hosting services to all agencies, boards and commissions under the Governor's office and any agency with which DoIT has an Inter-Agency Agreement. As such Web Content Management will design, develop and host your website using our Adobe Experience Manager platform and customized State of Illinois design framework. The framework ensures that all State of Illinois sites maintain a familiar yet individual identity. It supplies the most commonly used features and functions including site locators, photo galleries, event calendars, and other useful modules. Use of our design framework also ensures shared elements like events and meetings, forms and FAQs are exposed on the main www.illinois.gov website, which is often the first stop for people looking for services and support from Illinois state entities. Requests for new security groups and access to the platform and/or all its related tools may be made under this same group. <u>Modify</u> While normal content authoring tasks are the responsibility of the in-agency DoIT webmaster and associated Agency authors, for large content sections, new functionality requests or in cases where a agency needs work done due to absence or other circumstances the Web Content Management group will perform authoring and development tasks for organizations on their public websites. With these requests we work in coordination with a content reviewer to gather and approve the requested changes prior to publishing them to the public. Requests for modifying security groups and access to the platform and/or all its related tools may be made under this same group. <u>Migrate</u> DoIT provides "Public" website migration and hosting services to all agencies, boards and commissions under the Governor's office and any agency with which DoIT has an Inter-Agency Agreement. As such Web Content Management will assess, plan and migrate existing websites from their current content management system and/or coding platform into our Adobe Experience Manager platform and the State of Illinois design framework. As such some aspects of the site may require redesign or re-engineering to comply with the framework and take advantage of the features and components therein. A functionality analysis will be performed and component mapping will show these 	

	<p>features and how the existing site lines up to the design framework components.</p> <ul style="list-style-type: none"> • Decommission DoIT web content management staff will decommission the identified site and will remove access from both internal and external visitors. Additionally final analytics information will be exported and where possible archives of documents from the site will be provided to the requester if requested. Data retention and storage of any archival information on the site and/or of the site is the responsibility of the requester and not within the purview of DoIT. Requests to remove access to the platform and/or its related tools may be made under this same group.

SubCategory: 0365

Catalog Item Name		Lead Time:
Microsoft Bookings Request		5 days
Short Desc	Request a New Bookings Site, add owners, or delete an existing one.	
Description	Microsoft Bookings makes scheduling and managing appointments a breeze. Bookings includes a web-based booking calendar and integrates with Outlook to optimize your staff's calendar and give your customers flexibility to book a time that works best for them. Automated notification emails reduce no-shows and enhance customer satisfaction, and organizations save time with a reduction in repetitive scheduling tasks. With built in flexibility and ability to customize, Bookings can be designed to fit the situation and needs of many different parts of an organization. The Bookings calendar is a mailbox in Exchange Online.	
Microsoft Stream Request		5 days
Short Desc	Request access to Stream, create Groups, or Add users	
Description	Microsoft Stream is an Enterprise Video service where people in your organization can upload, view, and share videos securely. You can share recordings of classes, meetings, presentations, training sessions, or other videos that aid your team's collaboration.	
Request a SharePoint Site		2 days
Short Desc	New SharePoint Site	
Description	SharePoint empowers teamwork with dynamic and productive team sites for every project team, department, and division. Share files, data, news, and resources. Customize your site to streamline your team's work. Collaborate effortlessly and securely with team members inside and outside your organization, across PCs, Macs, and mobile devices.	
Request a Team		5 days
Short Desc	New Microsoft Team Site	
Description	Keep all your conversations, files, apps, and more in one place to seamlessly collaborate with your team members, whether they are inside or outside the organization.	
Legacy SharePoint Site Request		2 days
Short Desc	Use to make changes to existing Legacy SharePoint Sites or create new ones.	
Description	New Legacy SharePoint sites are discouraged but available in the rare cases they are still needed. We recommend creating a SharePoint Online Site when possible.	

SubCategory: Data Analytics

Catalog Item Name		Lead Time:
IBM Cloud Pak for Data (CP4D)		2 days
Short Desc	Request Access to IBM Cloud Pak for Data (CP4D)	
Description	IBM Cloud Pak for Data lets you connect to your data, govern it, find it, and use it for analysis. Cloud Pak for Data enables all of your data users to collaborate from a single, unified interface that supports many services that are designed to work together.	
Tableau Server Request		2 days
Short Desc	Request Access to Tableau Server	
Description	Tableau server is an online hosting platform to hold all your tableau workbooks, data sources and more. It enables everyone in an organization to see and understand data without the need of Tableau desktop.

Vulnerability Remediation Process		90 days
Short Desc	Method for agencies to submit approvals to have system/application patches applied	
Description	This approval process is required by DoIT to apply patches resulting in an outage to agency systems that are managed by Shared Services. By submitting the request for remediation you are approving the remediation to be done. This implies that your agency has also done research and testing where needed to limit potential negative impact.	

SubCategory: Hardware Relocation

Catalog Item Name		Lead Time:
Return Equip to DoIT		30 days
Short Desc	Return Equipment to the DoIT Warehouse. Includes data destruction/wiping	
Description	Use this service to request DoIT tagged computer hardware, (computer, monitor, peripheral) be moved to the DoIT Warehouse. This service also includes data destruction/wiping. If you are unable to locate the correct asset in the selection field, please contact DoIT.PropertyControlService@illinois.gov prior to submission.	

SubCategory: Hardware Reassignment

Catalog Item Name		Lead Time:
Hardware Reassignment		2 days
Short Desc	Request to reassign hardware assets to agency staff.	
Description	Use this catalog item to reassign hardware assets (PC, laptop, monitor, docking station, peripheral) to agency staff. Only updates information within the asset inventory system. NOTE: If software is needed or a computer should be reimaged, use the Modify Computer Hardware service instead.	

SubCategory: Hardware Change

Catalog Item Name		Lead Time:
Modify Computer Hardware		21 days
Short Desc	Move and/or Reimage Computer Equipment	
Description	Use this service to request computer hardware, (computer, monitor, peripheral) be moved and/or reimaged within the agency. This service also includes options for software installation as well as reassignment. NOTE: If a hardware reassignment only is needed to update inventory systems (no move or software required), then use the <u>Hardware Reassignment</u> catalog item instead.	

SubCategory: Printer Install

Description	This service is applicable when the <i>setup</i> of one <i>or</i> multiple networked printers need to be added, modified <i>or</i> removed at the same site. NOTE: Please follow the current Xerox procurement procedures for ordering printers.	

Category: Other

SubCategory: General

Catalog Item Name		Lead Time:
General Request		10 days
Short Desc	To be used when no other item in the catalog provides the required service	
Description	This item will be assigned to a central team who will triage your request and task it to the appropriate fulfillment team.	

Telecom Catalog Structure

The screenshot shows the 'Telecom Service Catalog' interface. At the top, there is a breadcrumb trail: 'Home > All Catalogs > Telecom Service Catalog' and a search bar labeled 'Search Catalog'. On the left, there are two 'Categories' dropdown menus, one of which is annotated with a red box labeled 'Category'. The main content area is titled 'Popular Items' and contains a table with columns for 'Item', 'Description', and 'Price'. The table lists several items: 'Video Service', 'Cellular (Order Guide)', 'General Request', 'Data Services (WAN)', 'VoIP Service', and 'Voice Service'. Annotations include a red box labeled 'Catalog Item' pointing to the 'Video Service' row, a red box labeled 'Catalog Item Short Description' pointing to the 'Description' column, and two red boxes labeled 'Card View' and 'List View' pointing to the view toggle icons in the top right corner.

Within each catalog item, templates are available for requesting desired services.

Click on the desired catalog item and a series of qualifying questions will be presented. Completeness and quality of response is critical to satisfactory fulfillment of the Service request.

Basic Information for Telecom Service Requests

The following standard questions are asked in all catalog items:

The form is titled 'Request Information' and contains several fields:

- Opened by:** A dropdown menu with a greyed-out selection and an information icon.
- Requested for Agency:** A dropdown menu with a greyed-out selection and an information icon.
- * Requested for:** A dropdown menu.
- Email Address:** A text input field with the value 'undefined'.
- Location:** A dropdown menu with a greyed-out selection and an information icon.
- Business Phone:** A text input field with the value 'undefined'.
- Mobile Phone:** A text input field with the value 'undefined'.

Request Information:

- The *Opened by* field is pre-populated with the Agency Technology Service Requester's (ATSR) information or Submitter information.
- The *Requested For Agency* is the Agency requesting the service. This will default to the Agency

associated to the user authenticated.

- *Requested for* field is the name of the service recipient. The Email address, Location, Business phone and Mobile phone will be populated once Requested for is selected.
- **NOTE:** If service recipient is not found in the drop-down list, then choose the generic Agency User (i.e. DOIT User). This will prompt for Guest User Details to be completed with service recipient information.

Guest User Information – If using generic Agency User, completing the Guest User Information is REQUIRED to ensure consistent identification of and reference to the service recipient going forward. If a Middle Initial is available, it is required. Street Address should be the address associated to “911” (P.O. Box numbers and building name are not permissible).

Agency Information

Requested for Agency	* Cost Center
<input type="text"/>	<input type="text"/>
Agency Tracking Number	
<input type="text"/>	

Agency info:

Requested by Agency will be populated with the Agency name associated with the ATSR/Submitter requesting services.

Cost Code- Select Agency specific cost center for billing purposes (Required)

Agency Tracking Number – If the approval for this request results from an existing **internal** Agency tracking system, enter the applicable system’s assigned reference number. (Optional)

Site Coordinator:

Site Coordinator Information

* Site Coordinator Name	Site Coordinator Agency
<input type="text"/>	<input type="text"/>
Location	Email Address
<input type="text"/>	<input type="text"/>
Mobile Phone	Business Phone
<input type="text"/>	<input type="text"/>

Site Coordinator Name - Name of the person to be contacted by the DoIT Services Teams if additional details are needed. Typically, this would be the supervisor of the individual receiving the service or the individual knowledgeable about the service request. (Required).

The Site Coordinator Agency, Email address, Location, Business phone and Mobile phone will be populated once Site Coordinator Name is selected.

Catalog Specific Questions – Each catalog service asks unique questions related to the service. Answer all questions as completely as possible to ensure timely response and minimize follow-up questions.

When all questions have been answered, submit the request. Once the request is submitted, a summary of the request with REQ number will be provided.

ServiceNow Telecom Catalog Items

Catalog items are presented in the Telecom Catalog under the following Categories:

Category: Cellular

Catalog Item Name		Lead Time:
Cellular (Order Guide)		7 days
Short Desc	This service is applicable for ordering Cellular devices, services and accessories	
Description	Use this selection for the following Cellular services: New/Upgrade Disable Plan/Feature Change Customer Provided Equipment (CPE) Order Accessories	

Category: Data

Catalog Item Name		Lead Time:
Data Services (WAN)		180 days – New/Move 90 days – Disable 60 days - Update
Short Desc	Request for data circuits Add, Disable, Upgrade or Move data circuits.	
Description	Wide Area Network (WAN) services provides managed Wide Area Data Communication by utilizing the Illinois Century Network (ICN). WAN Services are available for all State of Illinois agencies, boards, commissions, K-12, higher education, libraries, museums, healthcare facilities and municipalities.	

Category: General

Catalog Item Name		Lead Time:
General Request		International – 5 days Wiring only – 10 days Quote Only – 20 days NexTalk – 2 days Tele-Interpreter – 2 days VoIP migration – 60 days 800 service – 30 days Dropship – 10 days
Short Desc	To be used when no other item in the Telecom catalog provides the required service.	
Description	This item will be assigned to a central team who will triage your request and task it to the appropriate fulfillment team.	

Category: Video

Catalog Item Name		Lead Time:
Video Service		40 days
Short Desc	Request for Video Service. New, Move, Update or Disable Video Service	
Description	<p>Use this selection for the following Video services:</p> <p>New Move Update Disable</p> <p>The Cisco platform will provide consolidated agencies the ability to take advantage of enhanced collaboration tools with existing services such as WebEx, Jabber and centralized scheduling that will provide an easy multipoint conferencing solution. This centralized scheduling will allow all consolidated users the ability to schedule video resources through their Outlook calendar. Non-consolidated agencies will maintain the same capabilities as they have today.</p> <p>Video-conferencing is an efficient and cost-effective technology that can be used to conduct meetings, presentations or training sessions with minimal travel and lost time moving from one location to another. Using video-conferencing technology, remote sites can see, hear, and interact in meeting or training sessions without the inconvenience and costs associated with travel. In a video-conferencing meeting, a laptop or mobile device can be used to allow all parties in the meeting to view documents, images, or websites on display. The State of Illinois Video Conferencing Network (IVN) is currently established across the State and at many agency and educational locations. This provides for the opportunity to video-conference with rooms full of participants each in different locations or with individuals from their own desktop systems. In addition, video conferences can be held with other participants across the city, state, nation or around the world.</p>	

Category: Voice

Catalog Item Name		Lead Time:
Voice Service		5-10 days
Short Desc	This service is applicable for Voice (Non-VoIP) services	
Description	<p>Use this selection for the following Voice (Non-VoIP) services</p> <p>New Reactivate Update Move Disable Transfer of Ownership</p> <p>Available forms:</p> <p><u>Key Sheet and Adjunct Forms</u> <u>Transfer of Ownership</u> - <i>Form is to be used when transferring service to the State of Illinois</i></p>	

Category: VoIP

Catalog Item Name		Lead Time:
VoIP Service		10-40 days – New/Move 2 days – Update 5 days – Disable
Short Desc	Request for Voice over Internet Protocol (VoIP) New, Move, Update or Disable VoIP service	
Description	<p>Use this selection for the following VoIP services New Move Upgrade Disable</p> <p>Available forms:</p> <p><u>Side Car Template</u></p> <p>The Enterprise Voice over Internet Protocol (VoIP) Service applies communication technology in conjunction with IP data networks rather than traditional public switched telephone networks (PSTN). VoIP technology will enable you to make and receive telephone calls with your desk PC and phone communicating through the same LAN cable to your desk. VoIP is a proven and cost-effective solution as the State of Illinois migrates from leased phone lines to a State-owned enterprise VoIP system offering advanced features.</p> <p>DoIT telecommunications services are available to all State of Illinois agencies, boards, commissions, universities, Offices of the Illinois House and Senate, and Constitutional Officers connected through the Illinois Century Network (ICN).</p>	

Specific details of service offering attributes are available at:

<https://ilgov.sharepoint.com/sites/DoITSM/SP/SitePages/Data-Dictionary.aspx>

Escalation Process

Escalations

1. Escalations assume that a ticket has been opened and if necessary, approved by the ATSR.
2. Issue has been identified as CRITICAL by Agency Business Leaders and CIO/GCIO due to impact to agency critical functions, but not warranting an unplanned outage.
3. Requests for escalations must include the business need justification which will be entered into the tickets by CSD team at time of the escalation.
4. GCIOs/CIOs may delegate up to two (2) of their direct staff who are authorized to review and approve requests for escalations and monitor ServiceNow tickets and Dashboards.
 - a. Delegates listing may be monitored on the CIO Dashboard in ServiceNow.
 - b. Changes to delegates will be updated by GCIO/CIO via email to the Chief Customer Officer.
5. Escalations are reported on the CIO dashboard for awareness of how many tickets are escalated for both the enterprise and by agency.

REMINDER: If everything is an escalation, then nothing is a priority.

Standard Escalation Process

1. An Agency CIO/Group CIO or designee may email DoIT.ESR.AllAgencies@illinois.gov to initiate an escalation for a Service Request or an Incident. The email must contain supporting justification for escalation. **NOTE: Incidents that need escalation outside of business hours, must be reported to the DoIT Service Desk by calling 217-524-3648, Option 1.**
2. Send email to:
 1. DoIT.ESR.AllAgencies@illinois.gov
 2. Flag email as high priority (!)
 3. Subject: Escalation Request – Ticket #
3. Provide the ticket number.
4. Provide justification or business need for the escalation.
5. Customer Service Management team creates a work log entry including the provided information and marks the ticket as escalated.
6. DoIT fulfillment team/technician and their fulfillment group manager are notified by the ticketing system of the escalation.
7. The assigned DoIT fulfillment team/technician contacts the customer with an update and an estimated time of completion and makes a work note in the ticket.
8. The CIO/Group CIO or designee may follow-up with the Customer Service Management team or email DoIT.ESR.AllAgencies@illinois.gov if the DoIT Services fulfillment team / technician does not respond or make an onsite visit by the projected ETA defined within the ticket work notes for completion.
9. If no response, the Customer Service Management team escalates to the next level of DoIT team/technician and their manager.

Checking Status – Service Requests or Incidents

Service Request – IT Services (Business Service)

1. Send email to DoIT.ESR.AllAgencies@illinois.gov
2. Include ServiceNow request ticket number.
3. Request the most recent status update from the ServiceNow activity log or DoIT Services team / technician.
4. If you do not receive a response within a reasonable timeframe, contact the ITSD and ask to speak to a manager.
5. Ask the IT Service Processing Manager to track down a status and/or escalate if needed.

Service Request – Telecom Services (Telecom Services)

6. Send email to DoIT.TelecomProv@illinois.gov
7. Include ServiceNow request ticket number.
8. Request the most recent status update from the ServiceNow activity log or DoIT Services team / technician.
9. If you do not receive a response within a reasonable timeframe, contact the ITSD (Telecom) and ask to speak to a manager.
10. Ask the IT Service Processing Manager to track down a status and/or escalate if needed.

Incidents

1. Call the IT Service Desk or send email to DoIT.HelpDesk@illinois.gov
2. Provide the ITSD agent the ServiceNow ticket number (if known).
3. Request the most recent status update from the ServiceNow activity log.
4. Request to be contacted by the assigned DoIT Services team / technician if the work log is not current.
5. If the assigned DoIT Services team / technician does not respond within a reasonable timeframe, contact the ITSD and ask to speak to a manager.
6. Ask the ITSD Manager to track down a status and/or escalate if needed.
